

## **Environmental Policy**

Winmalee Christian Conference Centre provides fully catered conference and recreational facilities and overnight accommodation for guests.

The Conference Centre is sited on bushland adjacent to Blue Mountains National Park. The natural beauty of the bushland setting is enjoyed by our guests.

We acknowledge that the natural environment was originally created by God to sustain humanity. It is our life support system and provides many resources that are used for our benefit. Over time this environment has been impacted and modified by natural disasters and by humanity.

We aim to be sustainable and to minimise our impact on the natural environment in order to protect it for the benefit of future generations.

### **Legislative**

We will comply with all relevant environmental legislation and environmental codes of practice.

### **Awareness**

Our environmental policy will be available for staff and guests to view on our website.

### **Energy Consumption**

We aim to minimise energy consumption and maximise energy efficiency.

### **Water Consumption**

We aim to minimise water consumption.

### **Waste Management**

We aim to minimise the production of waste and maximise reuse and recycling.

### **Flora and fauna**

We aim to protect the natural habitats and wildlife on our property.

### **Access to bushland**

We aim to provide our guests with access to the local bushland via marked tracks.

### **Bushfire management**

Bushfires can have a major impact on the natural environment at Winmalee and the Conference Centre is located on bushfire prone land. We will cooperate with and assist the Rural Fire Service. Campfires will not be permitted during the statutory Bush Fire Danger Period and vegetation will be reduced in the Asset Protection Zone around our facilities.
